Cross Trainer

FSW239

The cross trainer has one welded steel frame connecting the front and the back of the machine. The frame creates an extremely strong and rigid constructing which is needed to cope with the high forces that can be applied.

The resistance unit and all mechanical parts are hidden in the fully closed cabinet which is made from UV-stabilized Polycarbonate (PC). As a result, entrapment is not possible, making it extremely safe to use and providing protection against the elements.

The magnetic resistance system is fully covered and can be adjusted with a rotatable handle in 10 steps. The selector system is intuitive in use, you rotate the handle to select a different amount of resistance.

The machine is equipped with a weighted flywheel that ensures that the motion stays fluid and comfortable during use.

The footplates are made from molded pp and secured to the cross trainer using 4 threaded inserts and accommodates most foot sizes.

The center console of has a phone holder made from s235 steel with a thickness of 6mm.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
