

Bicicleta con asiento alto

FSW247

KOMPAN
Let's play

The Bike offers high exercise value with user-friendly features. It's equipped with a magnetic brake and flywheel system that ensures a smooth cycling experience and adjustable resistance levels. The workload can be easily modified with a conveniently placed handle—starting from a light level of under 50 watts to an intense level that exceeds 500 watts with

rapid pedaling. Its handlebar is designed with multiple positions and a dedicated space for a smartphone, making it versatile for everything from rehabilitation to athletic training. The adjustable seat accommodates users from 160-205 cm.

The front tube for the frame is made of S235 hot-dip galvanized steel tubing with the following dimensions Ø76,1x3,6mm. and with a powder coating corrosion class C3 according to ISO12944-2.

The resistance unit and all mechanical parts are hidden in the fully closed cabinet which is made from UV-stabilized Polycarbonate (PC). As a result, entrapment is not possible, making it extremely safe to use and providing protection against the elements.

The magnetic resistance system is fully covered and can be adjusted with a rotatable handle in 10 steps. The selector system is intuitive in use, you rotate the handle to select a different amount of resistance.

The machine is equipped with a weighted flywheel that ensures that the motion stays fluid and comfortable during use.

Seat is made of injection molded soft PUR with a powder coated steel inlay made from s235 steel. The user can choose between 9 different seat heights, ranging between 845mm and 995mm. The seat allows users with a height of 150cm to 195 cm to comfortably use the bike.

The handlebar on the bike accommodates multiple different hand positions and riding styles. The handlebar is made from tubing with a circumference of ø34mm and a thickness of 3mm.

El marco general aplicado para estos factores es la Declaración Ambiental de Producto (EPD), que cuantifica "la información ambiental sobre el ciclo de vida de un producto y permite realizar comparaciones entre productos que cumplen la misma función" (ISO, 2006). Esto sigue la estructura y aplica un enfoque de evaluación del ciclo de vida a toda la etapa del producto, desde la materia prima hasta la fabricación (A1-A3))

Validation of CO₂ calculation method
BUREAU VERITAS
HSE Denmark A/S

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
