The Combi 4 Pro is a compact and complete street workout and calisthenics combination for training and competition. It features an incline bench, parallel bars, push up bar, decline press, Swedish ladder, human flagpole and pull up station. This is seven workout stations in one, and that is within only 397 ft². The 4'6" wide pull up bars are designed to give plenty of

space to dynamic exercises and promote sideways exercises such as the typewriter pull up. The wide bars also allow for users to do pull ups next to each other and so compete or motivate each other.

The information sign is made of a PA6 (Polyamide) and shows the most relevant exercise and a QR code. When scanned the QR code will link to an animated illustration of the exercise and offers the possibility of downloading the KOMPAN sport & fitness App, which will provide a large amount of exercises and workouts.

The connectors are made of die-cast aluminium, specially alloyed for the outdoor environments and heavy usage. The screws attaching the connectors are stainless steel and protected by zinc washers.

All bars intended for pull ups are made of solid, $\varnothing 32\text{mm} \times 138\text{m}$, hot dip galvanized, S235JR steel bars. This diameter gives the right grip for everyone.

The handles offer 4 different heights to place the hands or feet; 48cm, 76cm, 104cm and 132cm, creating the opportunity to scale the difficulty of the exercise.

Post are made of 101.6 x 2mm, pre-galvanized carbon steel and powder coated, a great protection to all conditions.

The surface is made of Ekogrip™ panels, consisting of 15mm polyethylene with a 3mm top-layer of thermoplastic rubber. The Ekogrip™ panels have a non-skid effect for comfortable and safe training at all weather circumstances.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
