Push ups, dips and handstands are an essential part of a Cross Training workout, a very effective form of exercise that combines the best activities of various sports, resulting in diverse and complete training sessions. Over the past decade this has grown to be the most popular fitness activity. The Parallel Bars are suitable for beginners who want to learn how to

do dips. They can start with leaning push-ups against the bar and can later move on to actual dips, which can initially be made easier by resting the feet on the additional bars. All parts where users will place their hands are covered with Polyurea coating which is highly durable against wear and tear, offers isolation and simultaneously gives users an outstanding grip

during their workout.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
