

Shop & Kitchen

MSV603

This is the perfect structure for the classic themes of Shop and Kitchen. There is so much to do in such a small space! Children will play for hours, time and time again with the varied and interesting play activities. This benefits the children's physical, social-emotional, cognitive, and creative development. Numerous play features motivate social play and support child

development: The conveyor belt and oven transport materials through, encouraging social interaction. The Shop side has tangible themes: microphone, switch, and money desk. The Kitchen side has an oven and cooker. The pushing, pulling, and investigation of the numerous play items stimulate the child's logical thinking skills. The rich themes inspire

dramatic play which is phenomenal for language development: a main factor for learning, friendships, and life success.

Bell

Cognitive: understanding cause and effect when ringing bell. **Creative:** leaving a mark in creating a sound rhythm when ringing or knocking the bell.

Microphone

Cognitive: inspires dramatic play which stimulates language development. Cause and effect understanding is supported when discovering that the microphone. **Creative:** positioning the microphone in different positions can support symbolic thinking.

Funnel

Social-Emotional: trains cooperation and turn-taking as children put materials into the funnel. **Cognitive:** the passing of materials through funnels supports the children's logical thinking and for younger children the understanding of object permanence: that materials don't vanish but run through at the other end.

Clock

Cognitive: learning about numeracy and time in a tangible way. **Creative:** leaving your mark on the playground when setting clock differently.

Crawl-through hole

Physical: the hole allows for climbing and crawling through, developing cross coordination, proprioception and spatial awareness. **Social-Emotional:** cooperation and turn-taking when passing one another. **Cognitive:** understanding space, shape and measures when seeing if the body can fit through the hole.

Conveyor belt

Physical: tactile stimulation from running hands over rolling spheres on conveyor belt. **Social-Emotional:** spurs group play and conversations with its two-sidedness. **Cognitive:** understanding of object permanence when pictures roll away and reappear.

Pot

Cognitive: filling, removing and emptying the pot stimulates cause and effect understanding and logical thinking when empty or full. **Creative:** placing the pot in other areas of the play space in creative ways can support symbolic and creative thinking.
