The Oasis Creator is incredibly engaging sand play unit that will have children playing hours and hours. The crane is worked horizontally as well as vertically either by turning the grey plate or pulling the chain. The sand bucket will go up or down when pulling the chain and will stay put when the chain is let go. This in addition to providing fascinating sand play, is a great

training of children's logical thinking skills. The negotiation and cooperation of moving the sand helps develop social-emotional skills. The sand table's sieve and tube lead sand away, training young children's understanding of object permanence: that things can still exist when out of sight. The sand wheel and shovel adds a quieter sand play corner. The platforms

are open and can be accessed in multiple ways, allowing for all users to play.

Rock climber

Physical: supports cross coordination and leg, arm and hand strength. The handholds on top ease entry into platform. **Social-Emotional:** the incline makes climbing feel safer, especially for younger children.

Side desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

Sand crane

Physical: hoisting the basket up and down trains arm muscles and dexterity. **Social-Emotional:** cooperating with others as in receiving the bucket trains cooperation skills. **Cognitive:** understanding the mechanism of the chains hoisting buckets up and down supports logical thinking skills. **Creative:** working with moveable play items that can leave a mark supports the child's creativity.

Sand desk with funnel

Social-Emotional: children can gather and store materials, cooperate and take a break together. **Cognitive:** sand can be shifted through the funnel, for understanding of cause and effect and object permanence: that materials don't vanish but run through at the other end.

Sand wheel

Cognitive: the turning sand wheel stimulates cause and effect understanding.

Sand shovel

Physical: develops dexterity and upper body muscles. **Cognitive:** understanding of object permanence, emptying and filling scoop.

Lower platform

Physical: climbing up, jumping down develops muscle and motor skills such as coordination, which are important in navigating your body securely through the world. **Social-Emotional:** children can sit and talk together. The step helps children who need extra height to maneuver the tap and water channel.
