

# Cadre 12 places H : 2,5 m

KSW9012

**KOMPANI**

Référence KSW9012-0902

## Informations générales

Dimensions LxPxH	1857x240x274 cm
Age minimum	2+
Capacité d'accueil (utilisateurs)	
Options de couleurs	●

Combinaison de cadre

# Cadre 12 places H : 2,5 m

KSW9012

**KOMPANI**

Référence KSW9012-0902

## Installation

Temps total d'installation	13,7 heures
Volume d'excavation	5,80 m <sup>3</sup>
Volume de béton	0,00 m <sup>3</sup>
Profondeur ancrage	85 cm
Poids d'expédition	483 kg
Options d'ancrage

Le cadre général appliqué est la Déclaration Environnementale Produit (DEP), qui quantifie « les informations environnementales sur le cycle de vie d'un produit et permet des comparaisons entre produits remplissant la même fonction » (ISO, 2006). Cela suit la structure et applique une approche d'évaluation du cycle de vie à l'ensemble de l'étape du produit, de la matière première à la fabrication (A1-A3))

## Independent review certificate

Kompan A/S  
C. F. Tietgens Blvd. 32C, 5220 Odense SØ

Bureau Veritas hereby attests that the CO<sub>2</sub>e-calculations (covering materials, processing, waste and transport) done by Kompan for "Freestanding Play Equipment", meet the requirements set by the listed standard.

Kompan A/S uses a selection of EPDs and emission factors from the Life Cycle Assessment database Ecoinvent 3.11. These values are reported as kg CO<sub>2</sub>e, with all other impact categories excluded in line with the scope of ISO 14067:2018. The emission factors cover, material use, manufacturing processes, transport to Kompan, and electricity used during manufacturing. The presented emissions fall under GHG Protocol scope 3 emissions. Scope 1 and 2 are not presented. Scope 3 emissions include emission sources in the upstream value chain of a company, downstream emissions are excluded in this analysis.

Method: ISO 14067:2018 using GHG protocol guidance documents, reported as kg CO<sub>2</sub>e.

### Object

The verification has been done on the one pager "KSW92011-0910" version: 27-10-2025. The supporting documentation "KOMPAN data\_updated emissions factors\_2025\_V2" and "Emissions factors, EPD's and ecoinvent 3.11\_2025" was also reviewed and approved.

### Declaration

The verification has been completed as a critical review with a limited assurance. I hereby confirm that nothing has come to the reviewer's attention which would lead to conclude that the study does not give an accurate depiction or isn't completed following method of the CO<sub>2</sub>e calculation, the requirements of ISO 14067:2018, and 14071:2024, in the above referenced documentation.

**Note:** This verification only covers calculation elements according to method described in ISO 14067:2018 and may not be seen as a Life Cycle Assessment according to ISO 14067:2018.
