

Climby Shifter

M7021

KOMPAN
Let's play

A whimsical design to heighten children's imagination. The Climby Shifter offers climbing and crawling, with easier and harder climbs to choose from. The sense of wonder is at work thanks to the conscious panel colour use: children climb from red or yellow into a new combination of colours. The inclined ground panel additionally challenges the senses of

balance and proprioception. This makes climbing the Climby Shifter great training for the motor skills and muscles: their cross-coordination and sense of balance need to be on alert. The wide platforms of the Climby Shifter invite breaks and offer roomy resting points for children. Thanks to the three panels, children can always find shelter from the wind

or the sun. Please notice the fine climbing studs, added to support the whole unit.

Climby Shifter

M7021

Turning sphere

Cognitive: stimulates a child's understanding of cause and effect when the rattle inside the sphere is turned. The smooth surface adds tactile variation. **Creative:** the rattle sound adds a creative element to play.

Crawl-through hole

Physical: the hole allows for climbing and crawling through, developing cross coordination, proprioception and spatial awareness. **Social-Emotional:** cooperation and turn-taking when passing one another. **Cognitive:** understanding space, shape and measures when seeing if the body can fit through the hole.

Rope ladder

Physical: climbing the ladder supports cross coordination and trains leg and arm muscles.

Inclined platform

Physical: trains the sense of balance and space. **Social-Emotional:** the room allows for more children being together

Teardrop handle

Physical: develops upper body muscles, when pulling yourself up or hanging from your arms.

Climbing cleat

Physical: placed to support hands and feet when crawling across, they train dexterity, hand and foot strength. **Social-Emotional:** adds the feeling of security, helping children to feel confident in climbing higher.

Climby Shifter

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

Foot support is made of HPL with a thickness of 17.8mm, which is very high wearing and also includes unique KOMPAN non-skid surface texture.

The steel surfaces are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Item no. M702104-3417P

Installation Information

| | |
|--------------------------|--------------------------|
| Max. fall height | 139 cm |
| Safety surfacing area | 20.3 m² |
| Total installation time | 8.6 hours |
| Excavation volume | 1.09 m³ |
| Concrete volume | 0.18 m³ |
| Footing depth (standard) | 63 cm |
| Shipment weight | 288 kg |
| Anchoring options | In-ground ✓ Surface ✓ |

Warranty Information

| | |
|-----------------------|----------|
| EcoCore HDPE | Lifetime |
| Galvanised Steel | Lifetime |
| HPL Decks | 15 years |
| Ropes & Nets | 10 years |
| Spare Parts Guarantee | 10 years |

Play activities like the turning ball are made of injection moulded high-quality UV-stabilised nylon (PA6).

Ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated to create a secure connection between steel and rope, which leads to excellent wear resistance.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with the lowest possible CO2e emission factor such as EcoCore™ panels of 100% post consumer recycled ocean waste.

Sustainability Data

M7021

| Cradle to Gate A1-A3 | Total CO ₂ emission | CO ₂ e/kg | Recycled materials |
|----------------------|--------------------------------|-------------------------|--------------------|
| | kg CO ₂ e | kg CO ₂ e/kg | % |
| M702104-3417P | 464.96 | 2.25 | 48.36 |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Themed play systems

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
