The Denali offers older children challenging play variation with many activities in a transparent and activity dense play structure. Getting up onto the lower tower happens via the steel rung ladder. Getting up to the higher tower is really challenging, making children consider each move as they climb the Jacob's Ladder. Only children with refined movement

skills can master this, which makes it a rich learning experience for them once mastered. The accessible stairway makes for easy access. On elevated level, the bridge and the tunnel lead to the immensely fun curly climber which is an asset for children of all abilities. Next to the tall slides is a quiet corner with play panels to explore and meet with friends in

deep play.
