KOMPAN
Let's play

The Super Combi 2 is a highly versatile structure. It has a perfect blend of high, low, and dynamic items. The overhead activities include the snake bar, the overhead ladder, and the rings. The climbing rope and the target shoot are fun and functional, and the Mag Bells provide dynamic strength training. The universal parallel bars stimulate exercise

creativity and can be used directly by wheelchair users. The integrated step platforms can be used for strength, jumping, and cardio —an excellent setup for more extensive group workouts.
Supervised products are only for areas that are gated or fenced-off, like fitness clubs with supervision or gated communities.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
