

\*\*9'-7" [292cm]

This architectural drawing shows a side elevation of a building facade. A vertical dimension line on the left indicates a height of 9 feet 7 inches, which is equivalent to 292 centimeters. The building features a series of horizontal lines representing a facade or a set of steps. Below this, there is a structure with vertical supports and a curved top edge. The drawing is a black and white line drawing.
