A harmonic design of play frames attract attention. Swinging in a stable, solid framework increases the feeling of security and thus increases the force, concentration and energy that the child dare put into swinging. The more stable, the more play intensity. So children will come back to enjoy the archaic experience of swinging, again and again, benefiting their

development of balance and coordination. Adding more seats in a swing frame motivates and enhances social play and cooperation.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
