The One Seat Swing is a sturdy entry-level swing for the small children of the family. The toddlers can learn the dynamics of a swing while enjoying close contact with the carer. The rubber seat is also placed at the right height for a child to lie on their stomach, push with their feet, and feel the swinging motion. This trains the child's motor skills, confidence, and sense

of balance and space. These are fundamental to the development of young children.

All organic Robinia products by KOMPAN are made of Robinia wood which is sourced from sustainable plantation farms. On request it can be supplied as FSC® Certified (FSC® C004450).

The standard seats of KOMPAN swings are engineered for maximum safety and durability. The seat two component seat with a PP inner core and outside rubber is produced in one operation. The seats are available with swing chains of either hot-dip galvanised steel or stainless steel for all swings heights.

Swing suspensions are made of polyamide and consist of a double ball bearing system with swivel.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
