

# Double Tower with Fireman's Pole

KPL2013

A classic play unit filled with many different challenges matched with its vibrant colours attracts children again and again with its open net bridge linking children to thrills of sliding and climbing. The tall climbing wall, the slide, the open net bridge, and the tall climbing net all create a play variety that makes children want to come back again and again. Besides being

great fun, this will also train the child's motor skills as well as muscles. When doing somersaults on the somersault bar, the child trains their sense of space and balance, both mandatory when building up life skills such as judging distances. The see-through net bridge adds thrill, giving the child a sense the height. The big net has small and big meshes,

facilitating climbing up and through. Topped with a slide for a fun exit and a fireman's pole for the daredevils amongst us. Fun and building life skills, all in one. With great colour dynamics to fit all environments, with pinewood posts or aluminium posts, plastic slide, or full steel. Let your imagination play.

Item no. KPL201311-0901	
General Product Information	
Dimensions LxWxH	326x383x307 cm
Age group	2+
Play capacity (users)	15
Colour options	 

# Double Tower with Fireman's Pole

KPL2013

## Somersault bar

**Physical:** develop balance, spatial awareness, core, arm and leg muscles, when climbing up and hanging. **Social-Emotional:** meeting, socialising and turn-taking when climbing up and down via bar.

## Slide

**Physical:** develops spatial awareness, sense of balance and trains core muscles when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down.

## Climbing net

**Physical:** children develop cross-body coordination and muscle strength when climbing. The big mesh supports proprioception and spatial awareness. **Social-Emotional:** the big meshes allow for more children to sit together and talk.

## Pipe ladder

**Physical:** cross coordination and eye-hand coordination are supported when children climb the ladder. The climbing also supports leg and arm muscles. **Social-Emotional:** learning about turn taking and cooperation.

## Fireman's pole

**Physical:** supports coordination, arm and core muscles. Landing strengthens bone density. **Social-Emotional:** turn-taking and risk-taking. **Cognitive:** young children develop their understanding of space, speed and distances when gliding down fast.

## Net bridge

**Physical:** children develop their balance, cross coordination and spatial awareness in the open net. **Social-Emotional:** interaction with children outside, socialising. Cooperation and consideration, e.g. when passing others.

## Rock climber

**Physical:** supports cross coordination and leg, arm and hand strength. **Social-Emotional:** the inclination makes climbing feel secure, especially for younger children.

# Double Tower with Fireman's Pole

KPL2013

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

The main tower posts are available in two types of material: European pine wood posts pressure impregnated Class 3 with Tanalith E preservative, or aluminium with an anodised surface treatment.

Floors and panel activities are manufactured from high-pressure laminate HPL with a thickness 17.8mm and non-skid surface texture.

Item no. KPL201311-0901

## Installation Information

Max. fall height	118 cm
Safety surfacing area	32.7 m²
Total installation time	12.1 hours
Excavation volume	1.54 m³
Concrete volume	0.00 m³
Footing depth (standard)	90 cm
Shipment weight	395 kg
Anchoring options	In-ground ✓ Surface ✓

## Warranty Information

Aluminum	15 years
EcoCore HDPE	Lifetime
Pinewood	10 years
Ropes & Nets	10 years
Spare Parts Guarantee	10 years

The large hollow components are made of 100% recyclable PE. The roof displayed is moulded in one piece with minimum 5,5mm wall thickness to ensure high durability in all climates around the world.

The slides can be chosen in six different colours and three materials: Straight or curved one-piece moulded PE slides, made from 33% recycled post-consumer materials in different colours. Combined EcoCore™ sides and stainless-steel. Full stainless steel in one piece design for more vandalism proof solutions.

The main posts are equipped with hot-dip galvanised steel footings. The steel footings elevate the posts position 20mm from ground level to avoid contact with surfacing material.

# Sustainability Data

KPL2013

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
KPL201311-0901	585.51	1.91	27.33

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Play systems

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
