The EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material. The core has a thickness of 15 mm and is representing 80% of the total material. The fully flat inside gives the best bounce experience when playing, this flat wall becomes a part of the game and means

the game can flow whilst adding another dimension that can challenge and develop players' tactical vision of the game. The 3 m x 2 m Multi Goal follows the goal size of FIFA Futsal and IHF Handball regulations. The basketball hoop is placed at the official NBA height of 305 cm, and has the official NBA size of 46 cm in diameter.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
