

# Sport Bike Pro

FAZ50200

**KOMPAN**  
Let's play

Item no. FAZ50200-0801

## General Product Information

|                       |               |
|-----------------------|---------------|
| Dimensions LxWxH      | 110x51x118 cm |
| Age group             | 13+           |
| Play capacity (users) | 1             |
| Colour options        |               |

See KOMPAN Fit app for more

The Sport Bike is an adjustable and interactive piece of cardio equipment, with the same quality and effectiveness you would expect at an indoor fitness centre. The Sport bike is all about an active riding style, with the frame in a forward leaning position for optimized riding performance, and an adjustable height for the sport bike saddle so that everyone can use the

bike in the right position. The patented, self-powered resistance units create a real road cycle experience, where resistance can automatically adapt depending on the pedalling speed. Alternatively, by using the KOMPAN App, users can choose to manually change the resistance.

# Sport Bike Pro

FAZ50200

The saddle is made of polyurethane rubber and is provided with a steel insert plate that connects it to the aluminium seat post. The saddle can be adjusted to 13 different heights with the help of a stainless steel pop pin

The cover is 4mm thick and made of Lexan™ Copolymer EXL9330, which is one of the toughest materials available in the world.

The Q-factor of the bike is 175mm, the crank is made of 18mm stainless steel and connects the pedal arms which are casted stainless steel (grade 304) parts. The length of the pedal arms is 170mm, and the pedals are connected with standard bike fittings.

| Item no. FAZ50200-0801   |                          |
|--------------------------|--------------------------|
| Installation Information |                          |
| Max. fall height         | 100 cm                   |
| Safety surfacing area    | 11.4 m <sup>2</sup>      |
| Total installation time  | 2.4                      |
| Excavation volume        | 0.34 m <sup>3</sup>      |
| Concrete volume          | 0.21 m <sup>3</sup>      |
| Footing depth (standard) | 80 cm                    |
| Shipment weight          | 126 kg                   |
| Anchoring options        | In-ground ✓<br>Surface ✓ |
| Warranty Information     |                          |
| Electronics              | 2 years                  |
| Frame                    | 10 years                 |
| Handle                   | 10 years                 |
| Saddle                   | 10 years                 |
| Spare Parts Guarantee    | 10 years                 |

The innovative self-powered electrical motor and gear are providing a virtual flywheel to give real road cycle experience. The resistance works as an automatic drive and adapts automatically to the pedalling speed. The users can overwrite the automatic drive manually by changing the resistance in steps (26-750 Watts) through KOMAPN's free fitness application.

The handle bars are designed with multiple hand positions to accommodate different postures and riding styles. It is a casted aluminium part with polyurea coating for good grip and insulation.

Users can connect their mobile phones or tablets to the cardio machines via bluetooth. This will provide instant feedback on speed, distance, cadence, watts, calories burnt. Through the KOMPAN Fitness App users can also use their smart devices to adjust resistance (10 levels) manually, and view instructional and motivational videos, store and share activity data online.

# Sustainability Data

FAZ50200

| Cradle to Gate A1-A3 | Total CO <sub>2</sub> emission | CO <sub>2</sub> e/kg    | Recycled materials |
|----------------------|--------------------------------|-------------------------|--------------------|
|                      | kg CO <sub>2</sub> e           | kg CO <sub>2</sub> e/kg | %                  |
| FAZ50200-0801        | 325.67                         | 4.36                    | 35.73              |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Fitness

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
