The Super Combi 3 is based on 360-degree activities in a square structure. It has a built-in challenge where you can move from the overhead ladder through the Turbo wheels and end in the snake bar. In addition to this, it has a low bar, incline press, target shoot, climbing ropes, rings, and jumping platforms. This package is a very engaging outdoor gym with a

compact footprint compared to many included activities. It is ideal for schools and most types of public areas.

De staanders zijn gemaakt van Ø101,6 x 2 mm, voorverzinkt koolstofstaal en voorzien van een poedercoating, een goede bescherming tegen alle omstandigheden.

The snake ladder is made of hot-dip galvanized s235 steel with the following dimensions Ø38 x 4mm. The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The rings are made of molded polycarbonate and TPE to ensure a good grip and soft surface. The rings are rotatable and allows for a large variety of exercises.

The top plate for the jumping platform is made of Ekogrip® panels that consist of a 15 mm polyethylene bottom layer, with a 3 mm top-layer of thermoplastic rubber with a non-skid effect for safe jumping exercises under all-weather circumstances.

The plate for the target is made from 19mm EcoCore™ HDPE that consists of +95% recycled post-consumer material from e.g., food packing waste in both core and colorful outer layer.

Overhead Turbo Challenge have a base of hot dip galvanisation and a powder coated top finish. This provides an ultimate corrosion resistance in all climates around the world.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
