The Triple Somersault Bars are great old-school playground favorites. They are irresistible to children, and their parents, repeatedly. The Triple Somersault Bars make possible cooperation and sharing, in two varied heights. They accomodate more users and different age and ability levels. The Triple Somersault Bars cater to a range of play

activities, including hanging from your arms, swaying, and training upper body muscles. They also create space for sitting on the bars with friends, sharing, using social-emotional skills or somersaulting. Somersaulting on the Triple Somersault Bars trains children's proprioception: the awareness of where body parts are and how to coordinate movements to

fit a space. It trains the senses of space and balance, too, making the child able to navigate the surroundings securely. Last, but not least, it develops major muscles.

Steel posts are galvanized inside and outside with powder coated top finish. This provides an ultimate corrosion resistance in all climates around the world.

The turnbars are hot dip galvanized inside and outside with lead free zinc. The galvanization has excellent corrosion resistance in outside environments and it requires low maintenance.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
