

Vertical Net/Wall Robinia

FRO216

The wall consists of two segments. The left side is a flat wall of almost 2.40m high which can be conquered by the fittest. The right side has three steps to assist the feet and eight handles to help you get over the wall. The scalable wall makes it fun for everyone to play or train together. Everyone will develop muscle strength and bone density when jumping over

or even improve their self-esteem if they dare to climb up. The Robinia bars are made from de-barked and sap-free Robinia trunks in various dimensions. Robinia is a native European wood species with high strength and natural durability in various climatic conditions. KOMPAN uses wood from FSC-certified

sources.

Item no. FRO21600-1001	
General Product Information	
Dimensions LxWxH	7'7"x3'8"x8'7"
Age group	13+
Play capacity (users)	3

Vertical Net/Wall Robinia

FRO216

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The Robinia wood can be supplied as untreated raw wood or painted with a brown colored transparent pigment that maintains the golden wood color of the wood.

All KOMPAN fitness products are compliant with the ASTM F3101 & EN16630 Outdoor Fitness Standards. Load tests are performed as a static test by adding dynamic factors as well as safety factors to the specified load of 78kg per user. A product intended for 1 user is loaded with 420kg.

Item no. FRO21600-1001	
Installation Information	
Max. fall height	7'8"
Safety surfacing area	168ft²
Total installation time	9.5 hours
Excavation volume	0.72yd³
Concrete volume	0.14yd³
Footing depth (standard)	3'3"
Shipment weight	813lbs
Anchoring options	In-ground Surface
Warranty Information	
Corocord Rope	10 Years
Hot dip galvanized steel	Lifetime
HPL panel	15 Years
Robinia Wood	10 Years
Spare Parts Availability	10 Years

The wall surface is made of 17.8mm thick High Pressure Laminate (HPL) panels to ensure optimal strength and durability.

The ropes are made of UV-stabilised PES with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

**ASTM
F3101**
compliant

Sustainability Data

FRO216

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
FRO21600-1001	338.76	1.14	6.65

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
