

10-Zitframe H:2.5m

KSW9010

KOMPAN 

Item nummer KSW9010-0902

Algemene Product Informatie

Afmetingen LxBxH	1556x240x274 cm
Leeftijdsgroep	2+
Capaciteit	
Kleuropties	

Schommelframe combinatie

10-Zitframe H:2.5m

KSW9010

Item nummer KSW9010-0902

Installatie informatie

Totale installatietijd	11,7 uren
Graafwerk (vol.)	4,97 m ³
Benodigd beton	0,00 m ³
Verankeringsdiepte	85 cm
Verzendingsgewicht	408 kg
Verankeringsopties	

EN
1176
compliant

Independent review certificate

Kompan A/S
C. F. Tietgens Blvd. 32C, 5220 Odense SØ

Bureau Veritas hereby attests that the CO₂e-calculations (covering materials, processing, waste and transport) done by Kompan for "Freestanding Play Equipment", meet the requirements set by the listed standard.

Kompan A/S uses a selection of EPDs and emission factors from the Life Cycle Assessment database Ecoinvent 3.11. These values are reported as kg CO₂e, with all other impact categories excluded in line with the scope of ISO 14067:2018. The emission factors cover, material use, manufacturing processes, transport to Kompan, and electricity used during manufacturing. The presented emissions fall under GHG Protocol scope 3 emissions. Scope 1 and 2 are not presented. Scope 3 emissions include emission sources in the upstream value chain of a company, downstream emissions are excluded in this analysis.

Method: ISO 14067:2018 using GHG protocol guidance documents, reported as kg CO₂e.

Object

The verification has been done on the one pager "KSW92011-0910" version: 27-10-2025. The supporting documentation "KOMPAN data_updated emissions factors_2025_V2" and "Emissions factors, EPD's and ecoinvent 3.11_2025" was also reviewed and approved.

Declaration

The verification has been completed as a critical review with a limited assurance. I hereby confirm that nothing has come to the reviewer's attention which would lead to conclude that the study does not give an accurate depiction or isn't completed following method of the CO₂e calculation, the requirements of ISO 14067:2018, and 14071:2024, in the above referenced documentation.

Note: This verification only covers calculation elements according to method described in ISO 14067:2018 and may not be seen as a Life Cycle Assessment according to ISO 14067:2018.

Het algemene kader dat voor deze factoren wordt toegepast is de Environmental Product Declaration (EPD), die "milieu-informatie over de levenscyclus van een product kwantificeert en vergelijkingen mogelijk maakt tussen producten die dezelfde functie vervullen" (ISO, 2006). Dit volgt de structuur en past een levenscyclus beoordelingsbenadering toe op de gehele productfase van grondstof tot product (A1-A3).
