NRO818

General Product Information

Dimensions LxWxH 444x184x260 cm
Age group 6+
Play capacity (users) 7
Color options

The Climbing Structure is a playground favourite with school children. They are immediately attracted to the dense, versatile activity hub. Thanks to the varied climbing opportunities with swaying ropes, rope ladders and stable climbing wall with cleats and climb through hole, all children have a chance of doing something. The openness in design also

invites conversation and social interaction across the Climbing Structure supporting children's social-emotional development. The dare-devils can enjoy a thrilling ride down the bannister bars. With its combination of activities, the Climbing Structure stimulates children's cross-coordination, strength and bone density. All of these abilities are built for

life in childhood, so the more they play, the more they gain.

NRO818

### Climbing grips

Physical: dexterity and cross-body coordination, sense of space, all important in navigating the body in space. Pushing, pulling and using fingers, arms, legs and core, strengthen the muscles.

#### Parkour ropes

Physical: the big rubbery discs are great support for the feet when climbing or crossing. This trains cross coordination, balance and arm and leg muscles. This combination adds to the child's body adeptness and awareness, adding security to movements. Social-Emotional: the seats make a nice destination and meeting point and take cooperation when crossing by others on the way through the module.

#### Banister bars

Physical: coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in childhood. Social-Emotional: turn-taking and risk-taking.

#### Rope ladder

Physical: cross coordination is supported when children climb the ladder. The climbing also trains leg and arm muscles. **Social-Emotional**: place for meeting, taking a break and socializing.

NRO818

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Full coloured EPDM rubber seats with smooth surface. The seats is are moulded on a hot dip galvanised steel inlay that ensures durable fixation to the rope.

Climbing panel of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use, but is also made of +95% recycled post-consumer material from e.g., food packing waste in both core and colorful outer layer.

# Item no. NRO818-1001

Max. fall height 248 cm Safety surfacing area 36.8 m<sup>2</sup> Total installation time 12.7 hours Excavation volume 2.10 m<sup>3</sup> Concrete volume 0.10 m<sup>3</sup> Footing depth (standard) 100 cm Shipment weight 600 kg In-ground Anchoring options

# Warranty Information EPDM components 2 years Plywood 5 years Robinia wood 15 years Ropes & nets 10 years Spare parts guaranteed 10 years

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made of +95% Post-consumer materials and is inductively melted onto each strand to obtain excellent wear and tear resistance.

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood

## Verification of CO<sub>2</sub> calculation of: Nature play

Data version no. 2023-10-05

The  $\mathrm{CO}_2$  calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
