BLOQX 5

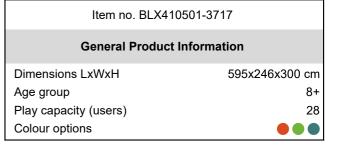

BLX4105

Three groundlevel attached modules and two flying BLOQX create an exciting climbing landscape. The bouldering routes are both long and challenging, especially every time the climber has to overcome the climb under a flying module. Only true climbing experts can master to reach the top module from a ground position. This asks for a tough cocktail of

balance, coordination and the top tuned use of physical strength. The clustered modules provide a good number of meeting places from where the strategy for the next climbing trip can be planned.

BLOQX 5

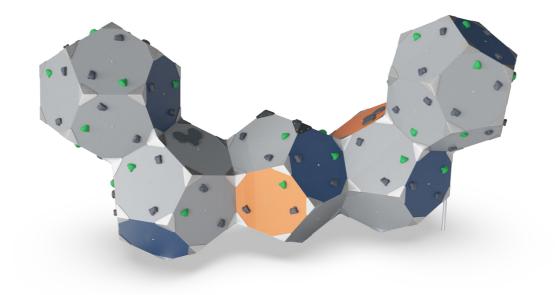

BLX4105

Climbing grips grid
Cognitive: logical thinking when figuring out
routes and memorizing position of grips you
can't see when climbing.

Multiple climbing blocks

Physical: develop sense of balance, proprioception and spatial awareness. Heavy duty training of arm, leg and core muscles when climbing longer. More points for strengthening bone density when jumping down. Social-Emotional: cooperation, consideration, turn-taking, risk-taking, self-confidence when self-regulating and helping others. Cognitive: logical thinking when figuring out longer routes.

Inclined panels

Physical: sense of balance when seated for breaks, and proprioception. Bone density when jumping down. Bone density is built up in youth to last the rest of your life. Social-Emotional: meeting points from where to help other children. Turn-taking and helping out are common activities on the BLOQXTM.

Meeting point

Physical: sense of balance when seated for breaks on an inclined surface. Social-Emotional: socializing, turn-taking, consideration of others.

Climbing grips

Physical: dexterity and cross-body coordination, sense of space, all important in navigating the body in space. Pushing, pulling and using fingers, arms, legs and core, strengthen the muscles.

BLX4105

High pressure moulded PP climbing panels with excellent impact strength and usable within a large temperature span. The panel are made from 75% post-consumer recycled materials in bright colors. Teal color is made from 75% ocean waste. The outside surface has an integrated pattern and surface texture that is dirt repellent.

Die-casted corner brackets of high quality lead free aluminium. The corner brackets have nicely rounded edges and countersunk stainless steel screws. For sunny environments the corner brackest can be supplied with optional powder coating which reduced the heat absorption of the brackets.

Climbing Grips are KOMPAN customized design, based on professionally designed climbing grips for optimal play value. The base material is polyester. There are two colours of climbing grips (green & black) and three on each panel. They are rotation secured by a steel pin.

Max. fall height 300 cm Safety surfacing area 50.7 m² Total installation time 34.4 hours Excavation volume 1.85 m³ Concrete volume 0.50 m^3 Footing depth (standard) 90 cm Shipment weight 805 kg Anchoring options In-ground Surface **Warranty Information** Climbing grips 10 years Climbing panels (PP) 10 years 10 years Corner brackets Hot dip galvanised steel Lifetime Spare parts guaranteed 10 years

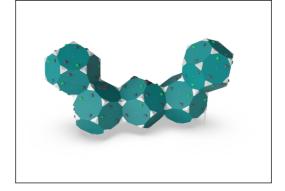

Item no. BLX410501-3717 **Installation Information**

The cubes are supported by a unique designed footing system that secures the correct positioning of the cubes.

To ensure maximum safety in all weather conditions a non-skid safety plate is located when climbing down from the elevated cube. Further, a number of the top corner brackets are covered with soft PUR.

Greenline Blogx products are built of molded PP panels which consist of 75% recycled post consumer ocean waste and 25% virgin material. The panels are designed with a unique pattern that provides a non-skid surface texture. GreenLine ensures the lowest possible CO2e emission factor.

Sustainability Data

BLX4105

Cradle to Gate A1-A3	Total CO₂ emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
BLX410501-3717	1,188.07	2.11	62.20

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Challengers & Climbers

Data version no. 20213-10-05

The $\mathrm{CO_2}$ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Challenger & Climbers" represented by item no.: GXY941032-3717.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
