This Oasis Sand Hut with Two Tables is a colourful sand-play break from the high action of other areas of the playground. It has two tables and a sand scoop for sorting, exchanging, and inventing games. The sand scoop teaches cause and effect, and social skills are developed when using the benches to play with others. The hut is made of beautiful

hand-crafted Robinia timber, which children can touch and feel and learn what natural timber is like.

### Sand shovel

**Physical:** develops dexterity and upper body muscles. **Cognitive:** understanding of object permanence, emptying and filling scoop.

Splash basin with plug
Social-Emotional: meeting point for
cooperation and sharing. Develops turn-taking
and cooperation. Cognitive: logical thinking
and understanding of 'cause and effect' are
trained when children stop or let go of water
from the basin. Creative: the water plug
makes changing water levels possible, which
adds to logical thinking skills.

### Side desk

**Social-Emotional:** fine meeting place and a space creator. Sharing and cooperation from both sides to create a social scenario that supports communication and cooperation.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
