Handhold Physical: the possibility to hold on tight enables intense rocking. This trains the hand and arm muscles.

Rocking together Social-Emotional: the possibility of rocking two together trains cooperation skills and consideration of others.

Rocking movement

Physical: response to movements adds to spatial awareness and sense of balance which are fundamental motor skills. Cognitive: trains the understanding of cause and effect: when I move my body, the spring responds with movement.

Posts and boards are made of pine wood from sustainable European sources. The wood is pressure impregnated Class 3 with Tanalith E. On request it can be supplied as FSC® Certified (FSC® C004450).

The steel surfaces are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The rocking movement is controlled by a heavy duty scaled rubber torsion spring element.

Panels of 19mm EcoCore[™]. EcoCore[™] is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

Colored steel components have a base of hot dip galvanization and a powder coated top finish. This provides an ultimate corrosion resistance in all climates around the world. Other steel surfaces are hot dip galvanized inside and outside with lead free zinc.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
