

Double Fitness Jumper

FSW233

KOMPAN
Let's play

Item no. FSW23300-0902	
General Product Information	
Dimensions LxWxH	192x363x117 cm
Age group	13+
Play capacity (users)	2
Colour options	

See KOMPAN Fit app for more

The double fitness jumper is designed to be fun, fun, fun - and of course effective for everybody. When exercising on a KOMPAN Fitness Jumper, you get an intense cardiovascular workout, you train your balance and improve your bone density. The Fitness Jumper challenges both the experienced fitness jumper athlete and the average fitness

enthusiast. The handlebars offer support for beginners and adds the possibility to do high intensity power rounds with extra high jumps. by sharing the same post for two handlebars the double fitness requires a small space to provide a training space for two.

Double Fitness Jumper

FSW233

The jumping membranes are made of 6.0mm thick EP Ethylene-Propylene conveyor belt with polyester polyamide fabric carcass. Spring fixations are reinforced with steel bushings and washers on both sides. The membrane is ozone resistant and equipped with 5 center placed water drain holes.

All 36 springs are made of stainless steel to ensure durability and excellent corrosion resistance. The steel wire is 3,2 mm thick and the last five windings are cone shaped to ensure long lifetime of the jumper.

The tiles are moulded in grey granulated recycled rubber (SBR/NR), and the KOMPAN logo is made from EPDM Ethylene Propylene Diene Monomer. Inside each of the rubber tiles, there is a 3 mm hot-dip galvanised steel plate.

All steel components are manufactured from carbon steel S235 in a thickness of 3 mm. Side panels, support walls for top frame, plates bended with SBR and plates flat for in-situ surfacing are hot dip galvanized.

As a unique feature the SBR tiles can be removed for cleaning and service. By loosening six screws the SBR tile can be lifted up to open and gain access to the springs (see instruction on KOMPAN Master).

The support handle is 530mm wide. The handle is 1050mm above ground level, and 1140mm above the jumper membrane. The handle is made from a 32mm diameter HDG bar.

Item no. FSW23300-0902

Installation Information

Max. fall height	100 cm
Safety surfacing area	21.0 m ²
Total installation time	7.2
Excavation volume	2.12 m ³
Concrete volume	1.09 m ³
Footing depth (standard)	90 cm
Shipment weight	754 kg
Anchoring options	In-ground ✓

Warranty Information

Galvanised Steel	Lifetime
Jumper Springs	2 years
Jumping bed material	2 years
SBR rubber	2 years
Spare Parts Guarantee	10 years

Sustainability Data

FSW233

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
FSW23300-0902	841.39	2.15	59.34

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
