

Expedite Trail

CRP200802

Item no. CRP200802-0901	
General Product Information	
Dimensions LxWxH	37'5"x23'4"x10'2"
Age group	2 - 5
Play capacity (users)	36
Color options	  

The amazing Expedite Trail offers a richly varied play journey that will attract toddlers again and again. It's a jungle of challenges for young children training motor skills intensely. Bouncy ropes, bridges, hurdles, and shelters all train the sense of balance, coordination, and proprioception. Developing these motor skills instills in the child an understanding of its physical capability and incorporates an

understanding of space, shapes, and measures, which is fundamental for understanding mathematics. Good motor skills form the basis for body confidence and the ability to move securely through the surroundings.

The various meeting places invite socializing, which supports the understanding of cultural

and social relations that will help make friends for life. The play panels and manipulative details encourage dramatic play. Dramatic play builds communication, language, and social skills. Children learn how to express themselves and how to be understood by friends and surroundings.

Expedite Trail

CRP200802

Unequal Hurdle Bridge

Physical: arm, leg and core muscles are trained when climbing up or through the bridge. Balance, spatial awareness and proprioception are stimulated, motor skills that help children move confidently. **Social-Emotional:** cooperation and turn-taking are supported when passing other children. **Cognitive:** cause and effect understanding is supported by the bouncing effect of others' movements.

Crawl-through hole with bubble window and membrane

Physical: the hole allows for climbing and crawling through, developing cross-coordination, proprioception and spatial awareness. **Social-Emotional:** cooperation and turn-taking when passing one another. **Cognitive:** understanding space, shape and measures when seeing if the body fits through the hole. Understanding object permanence when playing games such as peek-a-boo.

Sphere and faces panel

Social-Emotional: cooperating and communicating with others. Enhancing turn-taking skills and empathy when waiting their turn. **Cognitive:** stimulates theory of mind: that others may have different feelings. Stimulates the understanding of symbols and facial expressions as symbols for emotions. **Creative:** placing the sphere at different positions.

Cascading Bridge

Physical: trains balance, coordination and spatial awareness. Develop children's sense of rhythm and timing as they move the body across the bridge. All muscles are used to hold tight. **Social-Emotional:** turn-taking and consideration of others when passing each other. **Cognitive:** cause and effect understanding is supported by the bouncing effect of others' movements.

Water Lillie Pods

Physical: children develop agility, balance and cross-coordination when walking or running from pod to pod. **Social-Emotional:** turn-taking and cooperation as well as room for a seated rest with friends.

Treehouse Cottage

Physical: the bouncy membrane develops the sense of balance when children stand or sit. **Social-Emotional:** great point for a break or meeting with friends. The windows invite interaction between inside and outside. **Cognitive:** suggests a theme and supports dramatic play, which stimulates language and communication skills. The bubble window distorts the sound of voice, developing an understanding of cause-and-effect.

Wave Stepper

Physical: trains the sense of balance, fundamental for all other motor skills. This builds children's ability to navigate their bodies confidently and securely through the world. **Social-Emotional:** turn-taking skills and negotiation when crossing each other and seating, standing, jumping. **Cognitive:** supports cause-and-effect understanding when the steps slightly tilt in accordance with the children's movements.

Expedite Trail

CRP200802

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made of +95% Post-consumer materials and is inductively melted onto each strand to obtain excellent wear and tear resistance.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

The Corocord Smart Clamps are carefully designed to ensure superior flexibility in high-quality aluminum material. The smart clamps are attached around the post with four steel bolts. Unused attachment points are closed with PA caps.

The steel surfaces are hot-dip galvanized inside and outside with lead-free zinc. The galvanization has excellent corrosion resistance in outside environments and requires minimal maintenance.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of material produced from +95% recycled post-consumer material from food packing waste.

Grey round post decks are supported by hot-dipped galvanized steel and molded 75% post-consumer PP material with a non-skid pattern and texture surface.

Item no. CRP200802-0901	
Installation Information	
Max. fall height	2'7"
Safety surfacing area	1019ft²
Total installation time	38.9
Excavation volume	5.35yd³
Concrete volume	3.7yd³
Footing depth (standard)	2'11"
Shipment weight	2716lbs
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Corocord Rope	10 Years
EcoCore HDPE	Lifetime
Hot dip galvanized steel	Lifetime
PP Decks	10 Years
Spare Parts Availability	10 Years

Elevated activities 0	Accessible elevated activities	Accessible ground level activities	Accessible ground level play types
Present	0	10	3
Required	0	0	0

**ASTM
F1487**
compliant

Sustainability Data

CRP200802

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
