Balance Beam

KPL819

Item no. KPL819-0601

General Product Information

Dimensions LxWxH 10x300x30 cm
Age group 4+
Play capacity (users) 2
Color options

Balancing is always an attractive activity to children. This balancing beam invites children to compete individually or against other children. Through play children train and develop their balance and coordination, but they also use the balancing beam as a nice place to gather.

Balance Beam

KPL819

Beams are made of pine wood from sustainable European sources. The wood is pressure impregnated Class 3 with Tanalith E3475 according to EN335 (Equivalent to NTR Class AB).

The steel surfaces are hot dip galvanised inside and outside with lead free zinc and with powder coated top-finish. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Item no. KPL819-0601	
Installation Information	
Max. fall height	30 cm
Safety surfacing area	16.6 m²
Total installation time	1.1
Excavation volume	0.30 m³
Concrete volume	0.13 m³
Footing depth (standard)	60 cm
Shipment weight	27 kg
Anchoring options

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO_2 calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: $\mathrm{GXY916012\text{-}3417}$.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025 Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO_2 calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.

Publication date: 30. October 2023

By Bureau Veritas HSE www.bureauveritas.dk +45 7731 1000

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
