The Explorer Bridge attracts toddlers to try out their balancing skills, running back and forth repeatedly. A main part of the attraction is the responsiveness of the bridge planks: For every step the child takes, important physical skills are trained: it uses of the sense of balance, tensioning feet, legs, core and arms to adjust equilibrium. For less trained bridge-walkers, the

handholds add support. Running or walking the Explorer Bridge is a social experience. Children feel the movements of the other children on the bridge. This feature adds to the physical challenge of keeping the balance when passing on the Explorer Bridge. It additionally spurs cooperation, negotiation, turn-taking and consideration. These are important socio-

emotional life skills when making friends through play.

## Trekking bridge

**Physical:** the wobbly bridge trains balance and coordination as well as spatial awareness: when children cross the bridge by running or jumping. **Social-Emotional:** turn-taking and consideration when passing each other. Cooperation and socializing with others in and around the bridge.

## Stairs

**Physical:** cross coordination is used, supporting the cooperation of the left and right halves of the brain, which is necessary for reading. For young children, spatial awareness is trained when walking stairs.

Posts and boards are made of pine wood from sustainable European sources. The wood is pressure impregnated Class 3 with Tanalith E3475 according to EN335 (Equivalent to NTR Class AB). On request it can be supplied as FSC® Certified (FSC® C004450).

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
