This appealing sandpit invites children to play for long periods of time. Thanks to the four red seats or tables, the play gets diversity: the children have a firm plate to place sand tools and sand creations on. Carers have seats, and more parents can be seated facing the sandbox. This is well-known to facilitate longer stays. The four seats additionally give children

the possibility of creating each their space, from where they can have their home, their shop, their workshop. Sand invites deep play. The changeable character of sand from when dry to when wet fascinates children. It additionally trains their tactile sense and understanding of material character and nature phenomena. These are important life skills that

help the child understand the surrounding world. In short, sand play shapes motor skills and cognition.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
