**KOMPAN**  
Let's play

The Scout is an active play structure with colourful play features which attract toddlers to come and climb, slide and glide. The numerous entrances offer much variety on this compact unit. This builds layers of play opportunities and attracts children again and again. The varied climbing accesses offer both a fast and easy and a more challenging way up to the

platform. This trains muscles and cross-coordination. Cross-coordination is a fundament for later literacy. From the platform, there are two fun ways down to the ground, sliding or gliding. The fireman's pole trains the child's major muscles and gives them an understanding of space, which is fundamental for understanding mathematics. The slide trains

the child's core stability and sense of balance.

Item no. PCE105021-0603	
<b>General Product Information</b>	
Dimensions LxWxH	232x369x418 cm
Age group	2+
Play capacity (users)	10
Colour options

## Slide

**Physical:** develops spatial awareness, sense of balance and trains core muscles when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down.

## Stair ladder

**Physical:** cross coordination is used, supporting the cooperation of the left and right halves of the brain, which. For young children.

## Flower panel

**Social-Emotional:** invites cooperation due to the two-sides and provides for parallel play. **Cognitive:** stimulates cause and effect and logical thinking: sounds are made when the flower moves through the grooves **Creative:** children can leave their mark, placing the flowers in different positions.

## Fireman's pole

**Physical:** supports coordination, arm and core muscles. Landing strengthens bone density. **Social-Emotional:** turn-taking and risk-taking. **Cognitive:** young children develop their understanding of space, speed and distances when gliding down fast.

## Wall climber

**Physical:** climbing supports cross coordination, proprioception, and the development of major muscle groups and hand strength. **Social-Emotional:** two-sided climbing spurs social interaction and turn-taking.

The Curved ELEMENTS panels are moulded of UV stabilised recyclable PE with multiple options for in-built play features that also ensures a strong panel solution. Straight panels are made of KOMPAN 19mm PE EcoCore™ which is a highly durable, eco-friendly and recyclable material.

The climbing elements displayed are moulded in one piece with a minimum 5mm wall thickness. The climbing elements are made of recyclable PE, which has a high impact resistance across a wide temperature span and is also vandal resistance.

The ELEMENTS roofs are made of recyclable PE with a minimum wall thickness of 5 mm to ensure high durability in all climates around the world. The steel pipes are hot-dip galvanised inside and outside for maximum durability.

Item no. PCE105021-0603

### Installation Information

Max. fall height	118 cm
Safety surfacing area	25.1 m <sup>2</sup>
Total installation time	12.1
Excavation volume	0.65 m <sup>3</sup>
Concrete volume	0.30 m <sup>3</sup>
Footing depth (standard)	60 cm
Shipment weight	362 kg
Anchoring options	Surface ✓ In-ground ✓

### Warranty Information

Curved Panels	10 years
EcoCore HDPE	Lifetime
Membrane	2 years
Post	10 years
Spare Parts Guarantee	10 years

The main posts are made of high quality pre-galvanized steel with powder coated top finish. Post tops are closed with caps of UV stabilized nylon (PA6). The grey colored molded decks are made of 75% post-consumer ocean waste PP material with a non-skid pattern and textured surface. All decks are supported by uniquely designed, low-carbon aluminum profiles with multiple attachment options.

ELEMENTS rubber membranes are conveyor belt made of layers of rubber mixed of natural rubber and SBR rubber and embedded with layers of armouring made of woven PE and PA. The thickness 8mm ensures high durability in any environment.

ELEMENTS ropes have six-stranded steel wires and a steel wire core. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand. After initial friction has removed the surface fibres, a harder PES coating remains to protect each strand, making the ropes highly wear and vandalism resistant.

# Sustainability Data

PCE105021

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
<b>PCE105021-0603</b>	740.16	2.66	46.74

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Play systems

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
