

Up & Over Net

NRO812

The Up and Over Net is a quite a challenge that helps train basic motor skills. Children use their cross-coordination, proprioception and their muscles when they embark on the net and climb over the sturdy top beam to the other side. The wide spacing between the rungs is great for building leg, arm and core muscles. The three meshes allow for more children to

climb together. When they reach the top, they must make room for each other and so children get to expand social-emotional skills such as turn-taking and negotiation. The top beam is the perfect destination for a break with friends. Navigating up and down is good for training the sense of space which helps children estimate distances and risks in street traffic.

Item no. NRO812-1001

General Product Information

Dimensions LxWxH	6'11"x4'7"x4'7"
Age group	5 - 12
Play capacity (users)	2
Color options	 

Up & Over Net

NRO812

Top beam

Physical: climbing over the top beam demands good spatial awareness and involves risk taking. **Social-Emotional:** great destination for a break with friends.

Climbing net

Physical: the inclined net supports the upward climbing movement of the body. The net supports cross-body coordination, which impacts coordination of the right and left part of brain, fundamental for other skills such as the ability to read. The asymmetry of the net challenges the children's climbing.

Up & Over Net

NRO812

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

Nets and ropes are made of UV-stabilized PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

The Robinia wood can be supplied as untreated raw wood or painted with a brown colored transparent pigment that maintains the golden wood color of the wood.

Item no. NRO812-1001	
Installation Information	
Max. fall height	4'7"
Safety surfacing area	252ft ²
Total installation time	3.4
Excavation volume	1.14yd ³
Concrete volume	0.03yd ³
Footing depth (standard)	3'3"
Shipment weight	260lbs
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Robinia Wood	10 Years
Ropes & nets	10 Years
Spare Parts Availability	10 Years
Stainless steel components	Lifetime

Elevated activities 0	Accessible elevated activities	Accessible ground level activities	Accessible ground level play types

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
NRO812-1001	66.09	0.65	6.08

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Nature play

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
