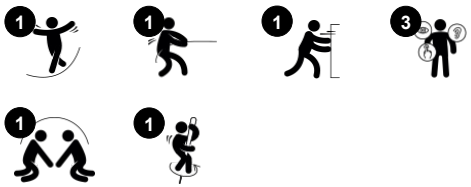
Toddler Spica

M191

Item no. M19101-3517P	
General Product Information	
Dimensions LxWxH	46x46x97 cm
Age group	1+
Play capacity (users)	1
Colour options	



On the Toddler Spica, one or more toddlers can train their vestibular system alone or together. The slow spinning sensation stimulates their vestibular system and allows them to understand their own strength, balance and curiosity. Toddlers can control the speed using their own body weight, and will quickly adapt to the cause-and-effect nature of the Toddler Spica, making it suitable for beginners and professionals alike.

Toddler Spica

M191

Seat
Physical: stepping up, jumping down develops muscle and motor skills. **Social-Emotional:** meeting, sharing and having a break.

Internal ball-bearing spinner
Cognitive: logical thinking, figuring out how to make the spinner work with gravity, not against it.

Pole
Physical: more gripping or leaning support points when standing, sitting, hanging holding tight and spinning.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The Toddler Spica bearings are installed in a one-piece design bearing house with integrated drain holes for water passage. The two large steel bearings are fully closed and lifetime lubricated.

Item no. M19101-3517P		
Installation Information		
Max. fall height		60 cm
Safety surfacing area		9.3 m²
Total installation time		1.8
Excavation volume		0.30 m³
Concrete volume		0.21 m³
Footing depth (standard)		70 cm
Shipment weight		32 kg
Anchoring options	In-ground	✔
	Surface	✔
Warranty Information		
Bearing construction		5 years
EcoCore HDPE		Lifetime
Hot dip galvanised steel		Lifetime
Spare parts guaranteed		10 years

Sustainability Data

M191

Cradle to Gate A1-A3	Total CO_2 emission	CO_2e/kg	Recycled materials
	kg CO_2e	kg CO_2e/kg	%
M19101-3517P	69.64	2.44	47.90

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

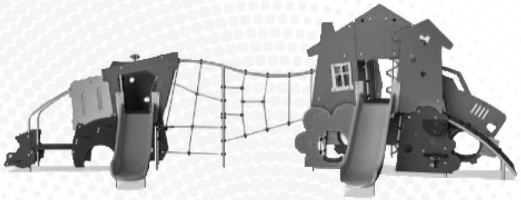
Validation of CO_2 calculation method
BUREAU VERITAS
HSE Denmark A/S

Verification of CO_2 calculation of: Themed play systems



Data version no. 2023-10-05

The CO_2 calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO_2 calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
