The fabulous Four Towers with Net and Bridges invite vigorous play and numerous activities. Varied bridges and towers offer physical thrill and play, and longer playtimes. This benefits health, well-being and social interaction. Under the platform, a rich variety of activities for all the senses attract children to explore and wonder, stimulating their logical thinking skills

and creativity. The varied and many access points help all children to strengthen their muscles and coordination. The four varied links between towers offer each their asset to the children's play and thrill seeking: firm, wobbly open and swaying, the bridges and nets offer fun and physically varied play stimulation. They train the agility, balance and cross-coordination

and build up spatial awareness as well as physical confidence. This eventually help children trust their skills and manage safer, e.g. in street traffic. The varied sliding and gliding supports posture and balance, all important skills, and fun!

Climbing net

Physical: children develop cross-body coordination and muscle strength when climbing. The big meshes allow for climbing and crawling through, supporting proprioception and spatial awareness. **Social-Emotional:** the big meshes allow for more children to sit together and talk.

Slide

Physical: sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down quickly.

Curly climber

Physical: coordination and proprioception are supported when placing arms and legs correctly for going down. Sense of balance when rotating. Arm muscles for holding tight. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** logical thinking when placing arms and legs right for rotating downwards.

Talk tube

Social-Emotional: encourages communication and social interaction. **Cognitive:** evokes curiosity and stimulates an understanding of cause and effect and object permanence: objects and persons exist also when out of sight.

Wackler bridge

Physical: sense of balance and space, and training of posture. Important for being able to sit still. **Social-Emotional:** cooperation, turn-taking and friendly competition on the plates.

Desk with conveyor belt

Physical: tactile stimulation from running hands over rolling spheres on conveyor belt. **Social-Emotional:** sharing and cooperation from both sides create a social scenario that supports communication and cooperation. **Cognitive:** supports dramatic play scenarios, trains cause and effect understanding.

Rock climber

Physical: supports cross coordination and leg, arm and hand strength. **Social-Emotional:** the inclination makes climbing feel secure, especially for younger children.
