

Small Play Net

COR23401

Item no. COR234011-1103

General Product Information

| | |
|-----------------------|---|
| Dimensions LxWxH | 571x571x260 cm |
| Age group | 3+ |
| Play capacity (users) | 11 |
| Colour options |  |

The Small Play Net provides rewarding climbing challenges from all angles. It attracts young aspiring climbers helping them to train their agility, balance, coordination and the ABC's of physical fitness at an early age. The carefully designed ropes respond to movement which helps children to feel their movements, and the movements of others, encouraging not

only physical fitness but emotional responsiveness. Children enjoy being on a structure that can accommodate many friends, and can enjoy the good feelings that come along with physical activities in the outdoors. This structure attracts children across the age span as it can be played upon by climbing beginners. It is not easily mastered to start with

encouraging children to stay and play for longer periods, enhancing their fitness levels.

Small Play Net

COR23401

Transparency

Social-Emotional: the transparency makes possible cooperation and communication throughout, all important life-skills for children to learn.

Sturdy, lower rungs

Physical: the stiff bounce of the lower rung supports balance and coordination as well as strengthens bone density when jumping down. **Social-Emotional:** great meeting point allowing socializing.

Big meshes

Physical: the big meshes allow for climbing and crawling, supporting proprioception, cross coordination and spatial awareness. Climbing here takes muscle strength, pushing and pulling arms to get upwards. **Social-Emotional:** allow more children being seated together, sharing.

Bouncy net meshes

Physical: agility, balance and coordination as well as spatial awareness are supported when bouncing, climbing and sitting in the net. Children use muscle strength of arms, legs and core, and build bone density when jumping down. **Social-Emotional:** the bouncing, swaying net appeals to empathy and cooperation. **Cognitive:** physical memory, logical thinking, concentration.

Small Play Net

COR23401

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand. The ropes are highly wear-and vandalism-resistant and can be replaced at site if needed.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

The aluminium swages of the net are double conical with rounded ends and are as small as safety allows. The overall net design aims at keeping metal parts within the net to an absolute minimum, both in size and number, in order to provide the best possible rope climbing experience.

Corocord membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armouring made of woven polyester. The armouring and the two surface layers result in a total thickness of 7.5 mm.

In the centre of the net is the mast, made of high quality seamless steel. The structure of the mast as an oscillating support is statically favourable and equalizes the oscillations in the net. The masts are hot dip galvanised as standard, with the design option of additional powder coating.

Through KOMPAN Variant Team, you can choose between additional 7 rope colours and customize your solution. The assortment is a wide span of colours ranking from elegant and expressive black or natural and toned-down hemp colour, to a range of attractive and eye-catching signal colours.

Item no. COR234011-1103

Installation Information

| | |
|--------------------------|---------------------|
| Max. fall height | 140 cm |
| Safety surfacing area | 42.2 m ² |
| Total installation time | 4.8 |
| Excavation volume | 4.93 m ³ |
| Concrete volume | 3.14 m ³ |
| Footing depth (standard) | 110 cm |
| Shipment weight | 215 kg |
| Anchoring options | In-ground ✓ |

Warranty Information

| | |
|------------------------|----------|
| Aluminium clamps | 10 years |
| Corocord rope | 10 years |
| Membrane | 2 years |
| S-Clamps | 10 years |
| Spare parts guaranteed | 10 years |

Sustainability Data

COR23401

| Cradle to Gate A1-A3 | Total CO ₂ emission | CO ₂ e/kg | Recycled materials |
|-----------------------|--------------------------------|-------------------------|--------------------|
| | kg CO ₂ e | kg CO ₂ e/kg | % |
| COR234011-1103 | 560.02 | 3.02 | 52.84 |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
