

Niagara

NAT527

With its multiple thrilling climbs, the Niagara hugely attracts world explorers among school-age children. The variety of challenging climbs and crawls via nets, poles, ladders, and tilted floors will make children return for more play again and again. The varied ways up and down Stimulate children's balance and cross-coordination, and the proprioception: The

inclined, straight, swaying, and firm climbs provide fun challenges for daredevils as well as more cautious explorers. The motor skills trained are important for children's physical confidence and their security in moving, for instance in the street. The senses of balance and space are trained to whiz down the banister bars. These skills are fundamental for

all other physical skills. The platform and net are nice meeting points for socialising with friends, planning new climbs.

Item no. NAT527-0912	
General Product Information	
Dimensions LxWxH	452x644x312 cm
Age group	6+
Play capacity (users)	13
Colour options	

Niagara

NAT527

Overhead ladder

Physical: develops children's upper body muscles and arm strength, cross coordination and spatial awareness. This is especially important due to sedentary lifestyles and back-pain in children. **Social-Emotional:** chill and socialize on top of the overhead ladder, training cooperation.

Banister bars

Physical: supports coordination, arm and core muscles. Landing strengthens bone density **Social-Emotional:** turn-taking and risk-taking.

Fireman's pole

Physical: supports coordination, arm and core muscles. Landing strengthens bone density. **Social-Emotional:** turn-taking and risk-taking.

Climbing pole

Physical: develops children's cross coordination, eye-hand coordination and muscle strength when climbing up or down. **Social-Emotional:** turn-taking and self-regulation are trained, both important life skills.

Inclined platform

Physical: trains the sense of balance and space. **Social-Emotional:** the room allows for more children being together

Climbing net

Physical: children develop cross-body coordination and muscle strength. The asymmetry of the net challenges the children's climbing and crawling through. **Social-Emotional:** the big meshes allow for more children seated together, sharing.

Niagara

NAT527

Posts and boards are made of pine wood from sustainable European sources. The wood is pressure impregnated Class 3 with Tanalith E. On request it can be supplied as FSC® Certified (FSC® C004450).

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

The steel surfaces are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Item no. NAT527-0912

Installation Information

Max. fall height	267 cm
Safety surfacing area	49.4 m²
Total installation time	14.1
Excavation volume	2.11 m³
Concrete volume	0.41 m³
Footing depth (standard)	91 cm
Shipment weight	451 kg
Anchoring options	In-ground ✓ Surface ✓

Warranty Information

EcoCore HDPE	Lifetime
Galvanised Steel	Lifetime
Pinewood	10 years
Ropes & Nets	10 years
Spare Parts Guarantee	10 years

Corocord ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand. PES has high strength with excellent resistance to abrasion and UV radiation. The rope loops are assembled by aluminum connectors.

The post end caps are made of injection molded high quality nylon (PA6). PA6 has good wearing and impact strength and is UV stabilized. The end caps protect vertical placed posts to ensure long lifetime.

The stainless steel activities are made of high-quality stainless steel. The steel is glass blasted after manufacturing to ensure a smooth gliding surface.

Sustainability Data

NAT527

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
NAT527-0912	862.67	2.22	38.58

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Nature play

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NR0409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
