Sit Up Bench Pro

FAZ606

The seat and back support are made of Polyurethane Rubber (PUR) and have an electro-galvanized steel insert plate that connects the seat to the steel frame. The seat and the back support are positioned under an 8-degree angle for the correct ergonomics. The back support has a groove to relieve the spine, accommodating a comfortable seating position, another benefit is that it drains water easily.

The bench has a support handle with a diameter of $\varnothing 30\text{mm}$. The support handle will make it easier to get on and off the bench and it will allow a variation in exercises. The grip powder coating, used on the support handle, is highly durable against wear and tear, offers isolation, and simultaneously gives users an outstanding grip during their workout.

All Steel components are made from carbon steel, with a hot-dip galvanized surface according to ISO1461, and a powder coating corrosion class C3 according to ISO12944-2. Lead content for surfaces is below 90ppm, and below 100ppm for base material.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
