

Toddler Carriage

M537

The delightful Toddler Carriage is a great meeting point for toddlers. It functions perfectly in combination with the Toddler Train. The through and meeting options offer physical and social play. The traffic theme will spur children's imagination: where are we going on the train? The toddlers enjoy moving their bodies around the train. This trains the cross-

coordination, which is crucial to train for toddlers. The cross-coordination supports the functions in the brain that facilitate later reading skills. Thanks to the semi-open sides and the doorways and window holes, social interactions are supported from the inside to the outside. Care giver interaction is made easier, and the holes invite a nice round of peek-a-boo. In spite

of transparency, the Train still provides corners for toddlers to play den in.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
