The Circite With House Membrane is a three-dimensional rope environment in which the child can move freely in all directions ensuring hours of play. Inside the construction, children can prove their climbing skills on the rope, while the frame and long ropes at the sides are perfectly suited for hanging. Muscle strength, cross-body coordination and spatial awareness are trained. These skills are fundamental e.g. when judging distances and managing traffic securely. Apart from physical stimulation, membranes allow children to sit and talk, socializing.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

The aluminium swages of the net are double conical with rounded ends and are as small as safety allows. The overall net design aims at keeping metal parts within the net to an absolute minimum, both in size and number, in order to provide the best possible rope climbing experience.

Corocord membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armouring made of woven polyester. The armouring and the two surface layers result in a total thickness of 7.5 mm.
Item no. COR104811-0405	
Installation Information	
Max. fall height	300 cm
Safety surfacing area	45.6 m²
Total installation time	21.3
Excavation volume	1.76 m³
Concrete volume	0.98 m³
Footing depth (standard)	90 cm
Shipment weight	776 kg
Anchoring options	In-ground ✔

The metal parts are made of high quality steel, hot dip galvanised inside and outside with leadfree zinc. On the outside, there is an additional layer of powder coating. This ensures both excellent corrosion resistance and colourful design expression.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of:
Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
