This toddler-sized Labyrinth with 2 Rooms will provide hours of fun for young children. The carefully designed structure offers play opportunities in all areas: physical, social-emotional, cognitive, and creative. Children will enjoy moving their bodies in and out as well as around the structure. The thoughtfully placed rubber knee-protectors placed in crawl-through

openings welcome this behavior. The motions support important physical as well as spatial understanding skills. The 360 design also supports social interactions through window and door spaces as well as through peek-aboo holes. The cooperation required for social interactions supports the development of social-emotional skills. An open-ended sensory

element such as the megaphone stimulates the understanding of cause and effect, stimulating cognitive development.

M63272

#### Theme

**Cognitive:** suggests a theme and supports dramatic play, which stimulates language and communication skills.

#### Desk

**Social-Emotional:** fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

#### Rench

**Social-Emotional:** gathering, cooperating or taking a break from play all train social skills.

#### Megaphone

Social-Emotional: inspires communication and turn-taking skills. Cognitive: distortion of sound evokes curiosity and stimulates an understanding of cause and effect.

### Crawl-through hole

Physical: the hole allows for climbing and crawling through, developing cross coordination, proprioception and spatial awareness. Social-Emotional: cooperation and turn-taking when passing one another. Cognitive: understanding space, shape and measurements when seeing if the body can fit through the hole.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
