The Maze is a highly attractive play activity that will appeal to children again and again. Steering the steel bullets through the maze to meet their destination points takes concentration and good control of big arm movement as well as smaller hand movements. This is a great training of motor and muscle skills and it makes a great fundament for

instance for hand-writing and drawing. The thrill of hitting the target points of the yellow, blue or red circle is second to none. Children love to play this game together, or they take a break from the wilder activities of the playground to retract for some solitary play. On the rear side of the play panel, a finger maze is placed. These different levels of mazes appeal to each

their sort of play and competence level. All in all, the Maze play panel is an excellent offering of concentrated small group or individual play. The play panel is high to make it inclusive of more ages and abilities.

Maze panel

Social-Emotional: communication and cooperation exploring the maze with friends.
Cognitive: stimulates memory when memorising maze routes.

Turnable Maze Panel

Social-Emotional: cooperating on completing the maze trains turn-taking and cooperation skills. **Cognitive:** figuring out how to turn the maze to make the balls fit into the goals trains logical thinking skills. The game character supports rules understanding and strategic thinking. **Creative:** leaving the balls in new positions allow children to leave a mark in the playground.
