

Play Tower with Swing, 1 Seat

PCM110621

This play tower with a swing enhances physical play with opportunities for children to move around by climbing, stretching, sliding, and swinging. The structure motivates children by providing a variety of play activities physical and social play. Climbing strengthens muscles and helps to develop cross-coordination skills. This enhances a child's ability to use both

sides of their brain, and supports the internal structures that enable reading and thinking. Sliding is immensely thrilling and also supports posture and balance, important skills for young children as they grow. They are the basis for all other physical skills and help to build up confidence to navigate the world securely. Swinging is a favorite playground activity, that

is an instant attractor for children. With lots of activities embedded in the structure, children will play for a long time, enhancing their health and well-being.
