KOMPAN
Let's play

Wow! The Tracker is a fantastic structure that will thrill children. With play on all sides, children will enhance their development in all areas, and they will play for longer times. Physical development will be supported by the rich variation of climbing, sliding, spinning and gliding activities. These all strengthen muscles and build important motor skills such as cross-

coordination. The wall climber and climbing pole are especially attractive and fun for children when they are building their climbing skills and strength. These experiences are also enhanced by the design of the Tracker which encourages social-emotional play and cooperation. With room for many to play, the Tracker supports social skills. The accessible

stairway invites all in, and the room under the platforms is a nice place to retract from the wilder gliding and sliding play. The Tracker perfectly supports all areas of development through active play.

Item no. PCE111021-0901	
General Product Information	
Dimensions LxWxH	428x427x383 cm
Age group	6+
Play capacity (users)	12
Color options

The Curved ELEMENTS panels are moulded of UV stabilised recyclable PE using 33% post-consumer recycled material. With multiple options for in-build play features that also ensures a strong panel solution. Straight panels are made of KOMPAN 19mm HDPE EcoCore™ which is a highly durable, ecofriendly and recyclable material made from +95% PCM.

The climbing elements displayed are moulded from 33% post-consumer recycled materials in one piece, with a minimum 5mm wall thickness. The climbing elements are made of recyclable PE which has a high impact resistance across a wide temperature span which ensures vandal resistance in all locations.

The ELEMENTS roofs are made of recyclable PE made from 33% post consumer recycled materials with a minimum wall thickness of 5 mm to ensure high durability in all climates around the world. The steel pipes are hot dip galvanised inside and outside for maximum durability.

Item no. PCE111021-0901	
Installation Information	
Max. fall height	179 cm
Safety surfacing area	37.2 m ²
Total installation time	22.3
Excavation volume	0.41 m ³
Concrete volume	0.06 m ³
Footing depth (standard)	85 cm
Shipment weight	653 kg
Anchoring options	Surface ✓ In-ground ✓

The main posts are made of high quality pregalvanized steel with powder coated top finish. Post tops are closed with caps of UV stabilized nylon (PA6). The grey colored molded decks are made of 75% post-consumer waste PP material with a non-skid pattern and texture surface. All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options.

ELEMENTS rubber membranes are conveyer belt made of layers of rubber mixed of natural rubber and SBR rubber, and embedded with layers of armouring made of woven PE and PA. The thickness 8mm ensures high durability in any environment.

ELEMENTS ropes has six-stranded steel wires and a steel wire core. Each strand is tightly wrapped with PES yarn, which is made from +95% post consumer materials. The yarn is then melted onto each individual strand making the ropes highly wear- and vandalism-resistant.

Sustainability Data

PCE111021

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
PCE111021-0901	1,326.20	2.75	49.30

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Play systems

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
