

FunPoint, Hangout

PCT804

The colorful circular Hangout Pods of the FunPoint, Hangout attracts young children and tweens alike. With their soft membrane swaying seats with plenty of room for multiple children to sit or hang, the Hangout Pods welcome children to play or sit and talk again and again. The swaying movements, in addition to being pleasant, also develop the

sense of space and balance when children rock slowly - or quickly - back and forth. The soothing movements make for longer meetings and conversations with friends, negotiating or taking turns on where to sit or hang. This ability to sit for a while makes the FunPoint, Hangout a perfect place to retract from the wildness of the play area.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
