

You & Me Swing Seat

SW990131

There is nothing as fun as swinging. The You & Me Seat adds to the joy by making it possible to swing in eye height with someone else. The back support helps younger children stay on the seat when the swinging starts. Their part of the swing has the seat positioned closer to the sturdy handholds, to add to the feeling of security. The older sibling or adult side is open

and here the sturdy steel handholds allow for extensive swing movements. The ride is more than mere fun: the swinging movements train the child's spatial awareness and sense of balance. A well-trained sense of balance and space helps children navigate the world securely, and adds to their self-confidence. Swinging together adds social-emotional

benefits, e.g. cooperation and the feeling of belonging. All of these are fundamental when making friends.

You & Me Swing Seat

SW990131

Back support

Physical: good, soft back support. **Social-Emotional:** feeling of security and comfort.

Grip bars

Physical: height and diameter to support grips of sizes from toddler to grandparent. **Social-Emotional:** feeling of security when being able to hold onto properly proportioned grip.

Openings for legs

Physical: ease of seating and room for movement. Facilitate lifting the child in and out the seat.

Swing seats

Physical: balance and spatial awareness are stimulated by swinging. These are necessary skills in judging distances. When swinging vigorously, the arm and core muscles are trained. **Social-Emotional:** the cooperation in movement of swinging together trains teamwork understanding and empathy. **Cognitive:** cause and effect understanding, managing rhythm and thinking skills for younger children.

You & Me Swing Seat

SW990131

KOMPAN heavy duty designed swing hangers of stainless steel with anti-twist function. The hangers are attached to the cross beam on a welded bracket with two bolts. The bearings are embedded with silicone lubricant and needs no further lubrication.

The You & Me Swing seat is fitted with 6mm stainless steel chains.

Colored steel components has a base of hot dip galvanization and a powder coated top finish. This provides an ultimate corrosion resistance in all climates around the world.

Seat is made of a molded PP insert with an outer soft layer of TPE rubber. TPE rubber has good shock absorption and ensures durable solution.

The You & Me swing seat can be installed in KOMPAN Portal swing systems for the heights 2.5m and 3.0m. The swing seat is not applicable for 2.0m. Further it can be installed in Robinia swings with height 2.5m.

Note: As the You & Me seat uses heavy duty swing hangers the seat can not be fitted onto swings with traditional swing hangers. In such cases a new crossbeam with heavy duty hangers must be installed.
