

# Leg Press

FSW40500

**KOMPANI** 

Varenr. FSW40500-0001

## Generel produktinformation

Dimensioner LxBxH	125x325x157 cm
Alder	13+
Kapacitet (brugere)	1
Farvemuligheder	

The Leg Press features an adjustable load to provide comprehensive weight training for all major lower-body muscles depending on the foot placement. For added safety and durability, all mechanical stops are placed inside the cover to eliminate crush points.

Varenr. FSW40500-0001

## Installationsinformation

Maks. faldhøjde	45 cm
Faldområde	24,6 m <sup>2</sup>
Installationstid (timer)	
Udgravningsmængde	
Betonmængde	
Forankringsdybde	
Fragtvægt	
Forankringsmuligheder	Overflade ✓

**EN**  
**16630**  
compliant

## Independent review certificate

Kompan A/S  
C. F. Tietgens Blvd. 32C, 5220 Odense SØ

Bureau Veritas hereby attests that the CO<sub>2</sub>e-calculations (covering materials, processing, waste and transport) done by Kompan for "Fitness", meet the requirements set by the listed standard.

Kompan A/S uses a selection of EPDs and emission factors from the Life Cycle Assessment database Ecoinvent 3.11. These values are reported as kg CO<sub>2</sub>e, with all other impact categories excluded in line with the scope of ISO 14067:2018. The emission factors cover, material use, manufacturing processes, transport to Kompan, and electricity used during manufacturing. The presented emissions fall under GHG Protocol scope 3 emissions. Scope 1 and 2 are not presented. Scope 3 emissions include emission sources in the upstream value chain of a company, downstream emissions are excluded in this analysis.

Method: ISO 14067:2018 using GHG protocol guidance documents, reported as kg CO<sub>2</sub>e.

### Object

The verification has been done on the one pager "FAZ10100-0900" version: 27-10-2025. The supporting documentation "KOMPAN data\_updated emissions factors\_2025\_V2" and "Emissions factors, EPD's and ecoinvent 3.11\_2025" was also reviewed and approved.

### Declaration

The review has been completed as a critical review with a limited assurance. I hereby confirm that nothing has come to the reviewer's attention which would lead to conclude that the study does not give an accurate depiction or isn't completed following method of the CO<sub>2</sub>e calculation, the requirements of ISO 14067:2018, and 14071:2024, in the above referenced documentation.

**Note:** This verification only covers calculation elements according to method described in ISO 14067:2018 and may not be seen as a Life Cycle Assessment according to ISO 14067:2018.

Den overordnede ramme for disse faktorer er Environmental Product Declaration (EPD), som kvantificerer "miljøoplysninger om et produkts livscyklus og muliggør sammenligninger mellem produkter, der opfylder samme funktion" (ISO, 2006). Dette følger strukturen og anvender en livscyklusvurderingstilgang til hele produktfasen fra råvarer til fremstilling (A1-A3))
