A playhut easily attracts in younger children who just want to simply play. The simple yet intentional design and the detail in its features supports and enhances children's play. The wide open space allows for a flow of children in and around the play space. This increases social interactions and supports the children when they are looking for a way to intercat with others comfortably. The roof provides a sheltered space allowing the children to move in and out of the playhut while using their imagination. The fenced section of the house also creates an additional opportunity for play and movement around the playhut. The children can use this area to talk, socialise, to pass materials such as sand through and to play hide and seek. All of these activities support a healthy development through play.

Cradle to Gate A1-A3

	Total CO₂ emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
NRO410-1021	33.35	0.19	1.18

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
