

Giant Bamboo Trail

CRP252401

Item no. CRP252401-0902

General Product Information

Dimensions LxWxH	60'11"x45'5"x15'5"
Age group	5 - 12
Play capacity (users)	68
Color options	  

The Giant Bamboo Trail provides thrilling, responsive challenges for children. The variety of play activities make them want to come back again and again for more fun. The nets act as a big trim trail and encourage games such as "the ground is made of lava". Lots of responsive, swaying and bouncing nets demand concentrated movement, adjusting for

different rhythms of climbing. The nets train agility, balance and coordination skills. Apart from being great fun, the Orbital Hangout Steps, the Sputnik, the Horizontal Net and the Coconut Rope allow children to take a break and socialise or cooperate together to move around the structure. This develops important social-emotional skills such as turn-taking,

helping and sharing. All in all, a fun trail that will attract children again and again!

Giant Bamboo Trail

CRP252401

Swaying seesaw

Physical: the Swaying Seesaw is a challenging training of balance, spatial awareness, and timing: to bounce each other up and down in this link is a balance quest that takes handholds, hence the supportive ropes. The skills trained here are fundamental for navigating traffic safely. **Social-Emotional:** passing others on the bridge intensely trains cooperation and communication skills.

Rope screw

Physical: rope walking is a challenging training of the sense of balance. The gently swaying rope adds to the challenge. When training the sense of balance this way, children also train their concentration skills.

Tensegrity

Physical: the twisted ropes that sway intensely train agility, balance and coordination, the ABCs of motor skills. All major muscles are trained when holding tight to cross the link. **Social-Emotional:** cooperation skills are needed here to cross from both sides simultaneously: concentration on holding tight when crossing calls for precise communication.

Orbital hangout steps

Physical: the spheres invite seated and standing swaying, balancing and bouncing. This supports children's proprioception, which helps them navigate surroundings confidently. Core and arm muscles are strengthened when holding tight and moving between spheres. **Social-Emotional:** children cooperate, turn-take and consider each other when balancing between spheres. This supports playful socializing.

Swaying bridge

Physical: the asymmetrically placed steps are suspended in ropes that sway. These two features train balance and cross coordination, both important for body control and other skills such as sitting still on a chair. **Social-Emotional:** passing others on the bridge stimulates cooperation and positive exchange.

Coconut rope

Physical: balance and coordination is supported when walking the swaying rope. A good sense of balance transfers to other skills such as sitting still on a chair. Bone density is developed when jumping off. **Social-Emotional:** children swaying together on the rope experience their own and others' movements. This spurs cooperation and consideration, e.g. when passing others on the rope.

Rope slalom

Physical: agility, balance and coordination when climbing through link, swaying on ropes. Arm, leg and core muscles are strengthened. These are important for posture control and also sitting still. **Social-Emotional:** turn-taking and consideration of others when climbing through. These skills are hard to teach but easy to learn in play.

Giant Bamboo Trail

CRP252401

Ropes are made of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester wrapping is inductively melted onto each strand to ensure excellent wear and tear resistance.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material.

Item no. CRP252401-0902	
Installation Information	
Max. fall height	8'10"
Safety surfacing area	2482ft²
Total installation time	58.8 hours
Excavation volume	49.34yd³
Concrete volume	27.01yd³
Footing depth (standard)	2'11"
Shipment weight	5430lbs
Anchoring options	Surface ✓ In-ground ✓
Warranty Information	
Aluminum clamps	10 Years
Hot dip galvanized steel	Lifetime
Painted toplayer	10 Years
Ropes & nets	10 Years
Spare Parts Availability	10 Years

Colored steel components have a base of hot dip galvanization and a powder coated top finish. This provides an ultimate corrosion resistance in all climates around the world. Other steel surfaces are hot dip galvanized inside and outside with lead free zinc.

The Corocord Smart Clamps are carefully designed to ensure superior flexibility in high-quality aluminum material. The smart clamps are attached around the post with four steel bolts. Unused attachment points are closed with PA caps.

The PP rope in coconut style has a diameter of 150 mm. The internal steel wire core has thimbles at both ends, which serve as attachments for the rope to existing connecting elements.

Sustainability Data

CRP252401

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
CRP252401-0902	6,982.32	3.56	44.58

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Validation of CO₂ calculation method
BUREAU VERITAS
HSE Denmark A/S

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
