Bobcat

M171

Item no. M17101-01P	
General Product Information	
Dimensions LxWxH	40x78x85 cm
Age group	1+
Play capacity (users)	1
Color options	🟠

Rocking on the Bobcat is a constantly demanding playground activity that children will return to again and again. Children are able to control the play by moving their bodies to make the Bobcat rock. They will feel a sense of achievement to have the bobcat respond to their movements. The two sides support the seated position, and the foot and hand holds provide a stable point to stem feet and hands from, to create the movement. This is not only fun, but is also imperative for physical and cognitive development. When children begin to learn there is a connection between their bodies and their movements, they begin to make cognitive connections to a range of body movements and sensations. The bobcat theme will be attractive to the child's imagination, and will encourage exciting physical and imaginative play.

Bobcat

M171

Item no. M17101-01P	
Installation Information	
Max. fall height	60 cm
Safety surfacing area	7.5 m²
Total installation time	1.4
Excavation volume	0.19 m³
Concrete volume	0.00 m³
Footing depth (standard)	45 cm
Shipment weight	40 kg
Anchoring options	In-ground ✔
	Surface ✔

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

KOMPAN Springs are made of high quality spring steel according to EN10270. The springs are cleaned by phosphating before they are painted with an epoxy primer and a polyester powder coating as top finish. The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

Handle is made of polypropylene PP with excellent impact strength and usable within a large temperature span.

The steel support posts are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Seat is made of Ekogrip™ panel that consist of a 15mm thick PE base with 3 mm top-layer of soft rubber with a non-skid effect.

Sustainability Data

M171

Cradle to Gate A1-A3	Total CO₂ emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
M17101-01P	82.80	2.30	53.70

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Validation of CO₂ calculation method
BUREAU VERITAS
HSE Denmark A/S

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GXY916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
