

Cableway, sloping ground, slide length 25m

M87201

Item no. M87201-3817

General Product Information

Dimensions LxWxH	3320x300x295 cm
Age group	5 - 12
Play capacity (users)	1
Colour options	●

The Zipline, Slope is the ultimate daredevil attraction. It will attract children who are risk averse too; with its width and supportive seat and handhold, anyone can have fun, and they will, again and again. The reason for this immense holding power lies mainly in the huge thrill of gliding through the air. The feeling of weightlessness and the swooshing through the

air develops spatial awareness as well as the child's understanding of gravity, space and speed. This is necessary for real life e.g. in managing traffic safely. The social skills are trained as children diligently hand back the seat to the next user in line. The running and pulling involved in this develops the child's cardio endurance as well as upper body

muscles. All in all, the large zipline is an asset of play that unites generations and abilities with ways for almost everyone to use it.

Cableway, sloping ground, slide length 25m

M87201

Dino seat

Physical: the three divisions and chains of the seat provide efficient handholds for both standing and seated swinging. **Social-Emotional:** the possibility of children swinging together, legs hanging down, trains cooperation, sequencing and turn-taking when swinging.

Long line

Physical: the lengthy glide through the air adds to the thrill and trains spatial awareness, trunk stability and upper-body muscles. All this helps support the child's physical self esteem, making e.g. positive risk taking easier.

PUR covered rope

Physical: firm grip when spinning and hanging from arms. Arm muscles developed when holding tight.

Cableway, sloping ground, slide length 25m

M87201

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The special designed seat is made of a steel insert covered with a soft layer of silicon rubber. The seat is impact tested to fulfill all global playground standards and the rope has an ergonomic handhold.

The high-quality steel cable with a diameter of 12mm is designed for heavy usage of the cableway for many years. The starting point is indicated by a knob. At the stop point there is special designed spring device ensuring a softer stop of the puller.

The steel cable 3 is tensioned by a special designed device. By turning the handle 1 the steel cable can be tensioned according to instruction in a safe way. After tensioning the cable is locked by three clamps 2. The tensioning device can also be used for adjustment during annual inspections.

KOMPAN cableways are available for flat or natural sloped surroundings and for surface or in-ground installation. Further the cableways can be supplied with one or two cables for children to ride together in friendly competition. For flat surroundings a starting mound or platform is needed to use the cableway.

Item no. M87201-3817	
Installation Information	
Max. fall height	100 cm
Safety surfacing area	130.5 m ²
Total installation time	10.2
Excavation volume	3.58 m ³
Concrete volume	1.15 m ³
Footing depth (standard)	100 cm
Shipment weight	360 kg
Anchoring options	In-ground ✓
Warranty Information	
Cable	10 years
Hot dip galvanised steel	Lifetime
Movable parts	2 years
Rubber seat	2 years
Spare parts guaranteed	10 years

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: KSW92011-0910.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
