Wood Plastic Composite (WPC) has the same texture and appearance as wood. It is maintenance-free and environmental friendly. WPC fits perfectly into a natural environment. The fully flat inside gives the best bounce experience when playing. This flat wall becomes a part of the game and means the game can flow whilst adding another dimension

that can challenge and develop players' tactical vision of the game. The 3m x 2m Multi-Goal follows the goal size of FIFA Futsal and IHF Handball regulations. The basketball hoop is placed at the official NBA height of 305 cm and has the official NBA size of 46 cm in diameter.

The Wood Plastic Composite panels are made of 100% recycled fibre/wood powder and High-Density Poly Ethylene (HDPE). With the dimensions of 860 x 110 x 30mm the boards are solid.

All steel components are manufactured from high-quality carbon steel and are hot-dip galvanised (HDG).

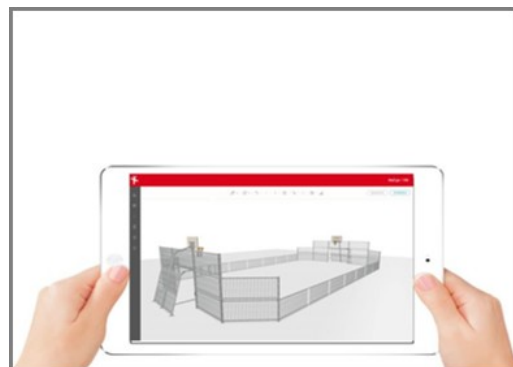

The net is made of a Ø4mm black polypropylene, better known as Nylon, with a mesh size of 45 x 45mm and reaches till 5m high. The nets will keep all balls in the MUGA and retains the transparency.

The WPC boards are attached to 70 x 45 x 3mm welded flanges with stainless steel M8 bolts, nuts and washers. These connections are not visible from the inside and create a safe and robust connection.
